Content SEO
98%
350 / 358 applicable checks passed

Technical SEO
100%
576 / 576 applicable checks passed

Audit completeness

Inspected	Passed	Inspection failed	Skipped	Pending
50	42	0	0	0

Counts refer to distinct inspected or queued URL/language variants. Passed is an inspected subset, not an additional outcome. Skipped URL records include non-page destinations. 60 distinct skipped URL records.

50 raw observations · 50 URL · 25 resources · 0 repeat observations · 8 inspected variants with SEO issues · 50 page attempts · 86 network requests

The configured crawl finished; exclusions and unavailable checks still limit what was verified.

Methodology

Score = round(100 × passed applicable checks / evaluated applicable checks). Content and technical checks are independent. Recommendations are unscored. Failed, skipped and pending inspections provide no SEO score or passing check. Repeated observations of the same URL, server language and check are not additional independent checks. These percentages do not predict Google rankings.

Immediate action items

1. Confirm the observed server language and preferred URL before changing metadata or indexing directives.
2. Address confirmed critical defects first, then warnings with the widest page impact.
3. Use the prioritized causes on page 2; retain the full report and JSON for every occurrence and verification step.

Prioritized distinct findings

Grouped by underlying cause; affected URL and language occurrences remain in the full report. This summary does not suppress or change scored checks.

1 **Repeated paragraph detected** Warning

Review whether the repeated passage is intentional; consolidate accidental duplication.

8 URLs · 8 occurrences · en, vi · https://www.garyhome.vn/en/homes/1-bedroom-apartment-for-rent-on-nguyen-cong-hoan-street-ba-dinh-bright-…

2 **Review clarity and relevance** Recommendation

Read the page in its target language. Explain unfamiliar terms, break up dense passages, verify facts and answer the reader's intent.

50 URLs · 50 occurrences · en, vi · https://www.garyhome.vn/en

3 **Some link destinations were not verified** Recommendation

Review skipped URLs and rescan relevant destinations. This audit does not certify unchecked links.

50 URLs · 50 occurrences · en, vi · https://www.garyhome.vn/en

4 **Server response timing recorded** Recommendation

Compare timings over time. Use browser performance tooling to investigate slow pages.

50 URLs · 50 occurrences · en, vi · https://www.garyhome.vn/en

5 **No JSON-LD found** Recommendation

Add a relevant schema type only when appropriate. Validate eligibility with Google's Rich Results Test.

24 URLs · 24 occurrences · en, vi · https://www.garyhome.vn/en

6 **Review description truncation** Recommendation

Put essential information first. Do not remove useful detail solely to meet a character target.

14 URLs · 14 occurrences · en, vi · https://www.garyhome.vn/en/homes/1-bedroom-apartment-for-rent-on-nguyen-cong-hoan-street-ba-dinh-bright-…

7 **Review title truncation** Recommendation

Use the desktop and mobile previews and put the distinguishing topic near the beginning.

14 URLs · 14 occurrences · en, vi · https://www.garyhome.vn/en/homes/1-bedroom-apartment-for-rent-on-nguyen-cong-hoan-street-ba-dinh-bright-…

8 **Replace generic image descriptions** Recommendation

Describe what matters in the image without adding unrelated keywords.

6 URLs · 6 occurrences · en, vi · https://www.garyhome.vn/en/tips-and-news/hanoi-rental-outlook-q3-2026

All available distinct actionable causes are shown. Fewer than five are listed when fewer than five are supported by evidence.

Limitations: server HTML inspection is not browser/Edge compatibility testing, Core Web Vitals, rich-result eligibility or actual Google index status. URLs, user-authored content and raw evidence are never translated by this report.
