AUDIT LIMITS
500 URLs · depth 4 · 15 minutes

Content SEO

98%

Technical SEO

100%

Score = round(100 × passed applicable checks / evaluated applicable checks). Content: 350/358; Technical: 576/576. Scores use evaluated, applicable checks only. An uninspected page contributes no score, passing check or SEO finding. Recommendations are unscored. These are applicable-check pass percentages; audit completeness is reported separately. They are not search ranking predictions.

Coverage and reliability

INSPECTED	PASSED	FAILED	SKIPPED	PENDING
50	42	0	0	0

50 raw observations, 0 repeated observations, 50 distinct URLs, 25 resources, 50 URL/server-language variants, 50 page attempts, 86 total network requests. Counts above describe distinct page variants. Passed is the inspected subset with at least one scored check and no failed scored checks. 60 distinct URLs appear in the exclusion/skip log, which can also include assets and external destinations.

Underlying cause groups

216 groups by cause, preferred URL and observed server language. Every affected URL and raw occurrence count is retained.

Content SEO: 100% **Technical SEO: 100%**

CONTENT SEO

Review clarity and relevance RECOMMENDATION

Detected 926 language-aware word segments and 338 sentences. These counts are context, not quality or ranking scores.

Action: Read the page in its target language. Explain unfamiliar terms, break up dense passages, verify facts and answer the reader's intent.

7 passed checks: Title is present; Description is present; Main content is present; Main heading is present; Heading structure is consistent; Image alt attributes are present; Internal links have descriptive labels.

TECHNICAL SEO

No JSON-LD found RECOMMENDATION

Structured data is optional and should describe eligible, visible content accurately.

Action: Add a relevant schema type only when appropriate. Validate eligibility with Google's Rich Results Test.

Server response timing recorded RECOMMENDATION

A single server fetch is not a Core Web Vitals or browser performance measurement.

2503 ms; 233149 HTML bytes

Action: Compare timings over time. Use browser performance tooling to investigate slow pages.

Some link destinations were not verified RECOMMENDATION

71 of 106 extracted links have an HTTP result. Remaining links may be excluded, blocked, external, or outside crawl limits.

Action: Review skipped URLs and rescan relevant destinations. This audit does not certify unchecked links.

11 passed checks: Successful HTTP response; No noindex directive found; Crawling permitted by robots.txt; Server HTML contains one title; Server HTML contains a description; Canonical URL is parseable; HTML language is declared; Hreflang declarations are parseable; Language alternates include the preferred page; Responsive viewport is declared; Page appears in a sitemap.

Interpretation and limitations

This audit inspects public server-delivered HTML and observed responses. Network timing does not measure Core Web Vitals; JSON-LD checks do not establish rich-result eligibility; language and relevance require editorial review. A noindex directive can be intentional. Pending pages require a resumed scan, and failed requests require availability diagnosis before any SEO conclusion.
